Made In Taiwan

The RWA Agency Arms EXA Pistol is the first GBB Pistol that RWA has ever released under the Agency Arms & Lone Wolf Distribution license. Most notably the pistol is the same training pistol used by Agency Arms Asset Paul Vandunk! At a glance, the EXA boasts Agency Arms' EXA Hybrid slide cut, mid-line outer barrel, and Lone Wolf's signature Timberwolf Frame. Out of the box, the pistol comes pre-installed with a fiber optic front sight and blackout rear sight, allowing for a cleaner sight picture as well as the consistency of a standard red dot optic.

New to the RWA Agency Arms lineup is the adjustable Syndicate trigger. Besides sporting the Syndicate branding, it allows the user to fine tune their trigger for a desired optimal trigger pull. The frame of the pistol also brings something new to the user experience, the signature Shark Scale Faux Stipple. Shark Scale Faux Stipple provides friction that is closest to a real stipple and the pre-cut frame provides each user a comfortable yet secure surface to hold and control while shooting. Overall, this pistol is designed to provide end users with the best out of the box shooting experience without the need for extra modifications nor a custom pistol's price tag.
